

6/10/16

Dear EPA members,
I implore you to revise your
lower Willamette cleanup plan
to improve the health of humans &
other creatures living in & near
this toxic dump. Please remove
at least 1000 acres of toxic sedi-
ment to a safe, contained site.
Please be brave and ask the
commercial interests responsi-
ble for the situation to take
a major financial role in
its cleanup. Letting Nature
clean this up is a complete
cop out!

Thank you for your continued

work on this — please be
brave to protect the health
of the creatures (including
humans!) in Portland!
